

## **DURABLE CAVOLINE® Box receives the Red Dot Design Award**

### **Award for CAVOLINE® cable box // Red Dot Design Award Winner 2020 for Product Design**

DURABLE's CAVOLINE® Cable Management Box has received the Red Dot Design Award for product design, triumphing over the other 6500 products that were entered.

The jury of 40 international design experts judged the CAVOLINE® box on quality, ergonomics, functionality and durability. This is the second prestigious award of the year for the innovative cable box which also received the iF Design Award in March.

CAVOLINE® is the cable management solution for keeping spaces tidy and safe from trip hazards, both in the workplace and at home.

The box is available in grey or anthracite and in two sizes which can house a 3 or 5-way multiple socket. The high-quality design is complemented by smart details such as a cable dot, soft components to protect cables and fire-retardant material.
